

**Dear friends and colleagues,**

It is our great pleasure to announce the revival of mini-symposium **Stem Cell Day**.

Stem Cell Day is a comfortable and effective platform created to discuss the researches performed by young scholars, whose activity lies within the fields of stem cell biology and regenerative medicine. The event is organized by the State Institute of Genetic and Regenerative Medicine, NAMS of Ukraine (Kyiv) and the Institute for Problems of Cryobiology and Cryomedicine, NAS of Ukraine (Kharkiv). This year our mini-symposium will be held on **8<sup>th</sup> of November** in Kyiv. More detailed information about the meeting venue will be provided in a nearest future by the next announcements.

**The topics of mini-symposium:**

- Stem cell biology.
- Regenerative medicine.
- Biomaterials and tissue engineering.
- Adoptive immunotherapy.
- Experimental *in vitro* / *in vivo* models in pre-clinical regenerative medicine research.
- Results of clinical trials and experience of application for gene- and cell-based biomedical products.

**Why to participate**

It is the great opportunity to present your research results for the wide discussion and debate. This year event will be broadcasted on-line that will allow to widen the entire audience and to involve more experts in the field from Ukraine and Europe.

The accepted materials will be peer reviewed and published as a short communications in the journal Problems of Cryobiology and Cryomedicine ([journal.cryo.org.ua](http://journal.cryo.org.ua)).

The audience would get two invited lectures, covering the state of the art within the scopes of mini-symposium. The accepted speakers of mini-symposium will obtain the unique opportunity for free participation in a Scientific and Practical Conference with International Participation Innovative Trends in Genetic and Regenerative Medicine, which will be held in Kyiv in the conference hall of State Institute of Traumatology and Orthopedics, NAMS of Ukraine during 9–10<sup>th</sup> of November 2017.

There are **no charges** planned for the participants of mini-symposium Stem Cell Day.

**Terms of participation and eligibility criteria**

**Young scientists** (researchers, undergraduate- and PhD-students from research institutes or universities), up to 40 years old, who conduct their research within the framework of the presented topics, are welcomed to participate in the symposium.

Speakers are expected to present the results of their **own research** (including those conducted mutually with other colleagues).

Form of participation: only the **oral reports** would be the part of the program (duration of 12 min), no poster presentations are planned.

Working languages: Ukrainian, English, Russian.

**The deadline for submission and registration of speakers is 15<sup>th</sup> of September 2017.**

**More details, guidelines for preparation and submission of papers, as well as registration of speakers and guests are available at the symposium website [www.stemcellday.org.ua](http://www.stemcellday.org.ua).**

**Contact** the organizing committee via e-mail [stemcellday@gmail.com](mailto:stemcellday@gmail.com).
